

Environmental and Social Impact Assessment Process

Fijian Law requires an Environmental and Social Impact Assessment (ESIA)

The Waisoi Project ESIA will:

Identify potential impacts on the environment and communities, and Propose ways to manage these impacts.

The ESIA Process

Stakeholder engagement

The ESIA will assist in project decision making

Water sampling as part of ESIA

The project would only continue if government regulatory approvals are given.

If government approval is received, Namosi Joint Venture (NJV) will then decide if the project will continue after the exploration and feasibility studies and ESIA phases are complete.
